NOTICE OF AMENDMENT

CERTIFIED MAIL - RETURN RECEIPT REQUESTED

November 21, 2019

Kimberly S. Greene

CPF 4-2019-1011M

Dear Ms. Greene:

On January 7, 2019 through June 22, 2019, a representative of the Pipeline and Hazardous Materials Safety Administration (PHMSA), Office of Pipeline Safety (OPS), pursuant to Chapter 601 of 49 United States Code (U.S.C.) inspected the facilities of your subsidiary, Golden Triangle Storage Inc., in Orange, Texas.

On the basis of the inspection, PHMSA has identified the apparent inadequacy found within Golden Triangle Storage's plans or procedures, as described below:

1. **§192.465 External corrosion control: Monitoring.**
 - (d) **Each operator shall take prompt remedial action to correct any deficiencies indicated by the monitoring.**

Golden Triangle Storage, Inc.'s procedure for corrosion control monitoring are inadequate and require revision. Section 8.24 of the written Corrosion Control Monitoring procedures (within the Operations and Maintenance Manual and Sections 8.2.1 (a) and 8.2.1 (f) of the Division 11 Manual) do not stipulate a timeline or timeframe for completing remediation after it has been identified in order to maintain the pipeline integrity. §192.465(d) requires "prompt" remedial action in order to ensure that the integrity of the pipeline is not compromised in anyway and that Corrosion Control Monitoring can be completed at the required frequencies. Golden Triangle should revise its procedures to define prompt as it relates to all corrosion control remediation activities required within its procedures.
